## Effective Cleaning of Plumbing & Disinfection of Water for Alfalfa

The use of HydroCor (NSF Hydrogen Peroxide) for Alfalfa is an important “tool” to improve the quality of the most important nutrient - **water**. Doing a water analysis prior to any application is highly recommended. The use of HydroCor (NSF Hydrogen Peroxide) Water in the germination process has proven to visibly accelerate it, by effectively controlling bacterial concerns. This process was also used successfully in fodder applications of all kinds. Comparisons of HydroCor (NSF Hydrogen Peroxide) treated seeds with untreated seeds were very evident. HydroCor (NSF Hydrogen Peroxide) treatment significantly enhanced the process by more than 15%. Water actually plays a key role in many parts of your operation. Without water there is no production involved on any farm. Since water is that important, it is equally important to note that **the quality of that water** is critical to your operation.

Disinfecting seeds is imperative, as all seeds carry foodborne pathogens. Bacteria (foodborne pathogens) such as E.Coli, salmonella, listeria and staphococcus aureus buildup is a consistent issue. Thorough cleaning & adapted disinfection routines decrease the pathogen level, which prevents or breaks the cycle of disease. Water is a natural cleanser, and can make

HydroCor (NSF Hydrogen Peroxide) is a unique water treatment & has been around for many years. Our “Premium Quality” Product is not only stabilized to give it better efficacy, it also has a proprietary formulation and is custom-made to fit your water needs. Our product helps disinfect and keep your plumbing clean and unplugged. With the addition of our stabilizer you will see long-lasting efficacy, and protection for your pipes against corrosion. It also helps bind and tie up contaminants, while softening your water up to 25%.

By using our customized application formula in your water, you will see results of improvement. However, the observations listed above are from specific situations, based on their own unique results and experiences. All water is different; every environment is different; every operator is different; and of course, every soil and seed is different. We cannot guarantee you will see any specific result listed above. But what we can guarantee is that you will immediately have **clean, clear, nutritional water**, and in a very short time, better results than without our applications. When your plant and soil have healthy, nutritional water it’s a good start. Raising the oxygen levels will further contribute to your overall production success. Application rates vary from operation to operation. For well-designed application rates, contact the Distributor in your area. If there is no Distributor, please contact us directly.

Note: This is not a “magic bullet” solution. Our customized formulation, procedures, and protocol depend on many factors, and available exclusively to our customers

***If this makes sense to you, please give us a call; we would love to have you as a customer***

**CLEAN ~ CLEAR ~  
NUTRITIONAL WATER  
IS OUR PASSION!**

*Caution: do not add fertilizers in the water at the same time as you add HydroCor (NSF Hydrogen Peroxide), without doing a Jar Test. Some fertilizers might plug emitters when mixed with oxygen. Always consult either your local Distributor or us prior to application to make sure it is done right.*

## Effective Germination with HydroCor (NSF Hydrogen Peroxide)

The use of HydroCor (NSF Hydrogen Peroxide) for Germination of Seeds is an important “tool” to reduce the potential of bacterial contamination. The use of a custom-formulated HydroCor (NSF Hydrogen Peroxide) solution in the germination process has proven to accelerate the process and to be very effective in controlling bacterial concerns. This process was also used successfully in fodder applications of all kinds. The comparison of seeds used with HydroCor (NSF Hydrogen Peroxide) and seeds that were not treated was very evident. The HydroCor (NSF Hydrogen Peroxide) process significantly enhanced the process by more than 15%. Water actually plays a vital role in many parts of your operation. Without water, no production involved on any type of farm would be possible. If water is that important, it is equally as important to note that the **quality** of that water is equally critical to your operation.

Disinfecting seeds is imperative, as all seeds carry food-borne pathogens. Bacteria build-up (foodborne pathogens) such as E.coli, salmonella, listeria and staphylococcus aureus is a consistent issue. Thorough cleaning & adapted disinfection routine decrease the pathogen level which in turn prevents or breaks the cycle of disease. Water is a natural cleanser, and can make managing these issues much easier and cost-effective.

HydroCor (NSF Hydrogen Peroxide) is a unique water treatment & purification system that has years. Our “Premium Quality” Product is not only stabilized to give it better efficacy, it also has a proprietary formulation and is custom-made to fit your water needs. Our product helps disinfect and keep your plumbing clean and unplugged. With the addition of our stabilizer you will see long-lasting efficacy, and protection for your pipes against corrosion. It also helps bind and tie up contaminants, while softening your water up to 25%.

***Seed germination is the most pivotal phase of the plant life cycle, affecting plant growth and productivity.***

Healthy seeds are critical to your success. We can help you accomplish a safe environment and process with our processes and line of products. However, the observations listed above are from specific situations, based on their own unique results and experiences. All water is different; every environment is different; every operator is different; and of course, every soil and seed is different. We cannot guarantee you will see any specific result listed above. But what we can guarantee is that you will immediately have **clean, clear, nutritional water**, and in a very short time, better results than without our applications. When your plant and soil have healthy, nutritional water it's a good start. Raising the oxygen levels will further contribute to your overall production success. Application rates vary from operation to operation. For well-designed application rates, contact the Distributor in your area. If there is no Distributor, please contact us directly.

Note: This is not a “magic bullet” solution. Our customized formulation, procedures, and protocol depend on many factors, and available exclusively to our customers.
